CROSS-REFERENCE TO RELATED APPLICATIONS

The present application is a filing under 35 USC § 371 of International Patent Application No. PCT/GB2005/000482, filed February 11, 2005.

FIELD OF THE INVENTION

The present invention relates to a method and apparatus for checking that an object is genuine. The object has a plurality of randomly distributed identification elements affixed to or embedded in the object. The object also has a reference point defining an area of the object in which at least some of the identification elements are provided. The invention relates especially, but not exclusively, to fluorescent identification elements.
